

Fajardo & Associates, LLC

Thanks Online Services IDM,

You have made me a believer. I heard many good things about your service from other business people we both know, but I really wasn't expecting to get business from my website. I had previously built myself an original website and got no business from it.

Online Services, you have proven to me that having a website professionally done and most importantly professionally marketed in the internet is really the key to growing your business. First let me tell you that you have built us a beautiful website that looks absolutely professional. In fact, I am amazed that you were able to write so much great content about my business with very little input from me. Your writing skills are amazing.

But the absolute most important thing about your service is how your marketing program has positioned us in the 1st page of all the major search engines for really important keywords for our business. **In some cases, we are number 1, 2 and 3 out of 43 Million other web pages.** That is unbelievable and to think that this has transpired in less than 90 days, you guys are nothing short of amazing.

Online Services, because of your marketing services we have landed 4 major clients in the past 3 months worth thousands of dollars in new business each year. Every week there is a high quality potential client contacting us directly from the website looking for our services. I did not know that this type of marketing could actually deliver these kinds of results.

As a CPA I am in the business of watching Return on Investments and this is the absolute best ROI I have ever seen.

Thanks so much to all of your team at Online Services IDM.

Sincerely

Ruben Fajardo
